

Fire detection

Cegelec Fire Solutions designs, installs, optimises and maintains fire protection systems, so maximum safety is always guaranteed. An important step in fire protection is fire detection. Cegelec Fire Solutions can provide and integrate various systems into the fire detection system according to demand. Below is a list of the certified fire detection systems that Cegelec Fire Solutions installs.

- Analog addressable fire control panel
- Fire extinguishing control panels
- Conventional system
- Wireless detection
- Gas detection
- Linear detection
- Air analysis detection
- Smoke detection and thermal detection via camera
- Flame detection
- Voice evacuation

As a BOSEC and FISQ certified company, Cegelec Fire Solutions is responsible for the entire process from study phase to commissioning, with high-quality service after completion. It's a key feature of this service that customer orientation, professionalism and innovation are always the focus.

FIRE DETECTION
